

Quick Release Vise

Stock #236818

The Golfsmith Quick Release Vise can be bolted to a counter top or temporarily secured in the jaws of a vise. To secure on a bench top, do not use the vertical flange attached to the underside of the unit.

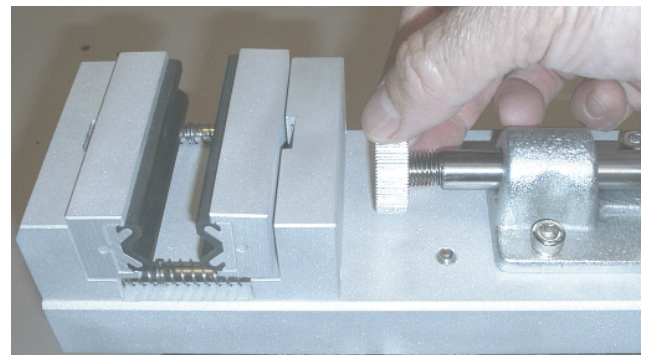

The Quick Release Vise is shipped with three different sets of jaws. As clubmaking needs change the type of jaws can be quickly interchanged. These

- 1 - For securing smaller diameter such as shaft tips.
- 2 - Handles larger diameters such as shaft butts.
- 3 - Solid aluminum "V" clamp for securing broken shaft tip stubs for extraction.

Jaws can be quickly removed by wedging a flat head screwdriver between the insert and the vise.

Jaw pressure can be adjusted by rotating the lateral force bolt to the appropriate tension.
